Who We Are

Value Added Distributors is a premier wire harness assembly manufacturer and distributor of electrical supplies. We take pride in manufacturing high quality wire harnesses, battery cables and control panels built to your exact specifications with documented quality. Regardless of the size of the job, we are committed to providing exceptional service!

Our Specialties:

Kitting & Custom Packaging

Value Added Distributors can “Kit” parts such as electrical components, connectors, terminals and shrink tube under one part number to reduce inventory and simplify ordering parts. Custom labeling with your part numbers is also available!

CAD Design & Prototype Harness

Our in-house CAD department designs your wire harness from the beginning to final assembly. A design specialist can work with your engineers and installers to provide recommendations that minimize cost and maximize efficiency.

Harness Testing

Value Added Distributors uses Cirris continuity testing to ensure you're receiving the highest quality wire harnesses manufactured. **Every** harness that leaves our facility is tested for quality assurance. Depending on volume/usage harnesses are Cirris tested with mating connectors or point to point tested by hand.

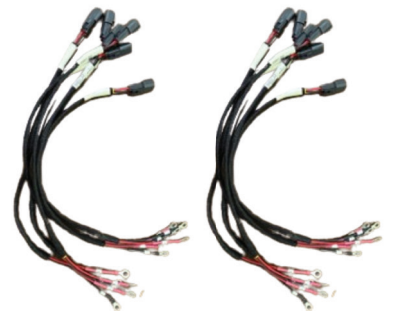

Wire Harnesses & Replacement Parts

Your #1 Wire Harness Manufacturer!

Quality wire harnesses are crucial in heavy equipment operations to ensure safety, reliability, and efficiency. Value Added Distributors manufacture custom, high quality wire harnesses built to your exact specifications.

- Wide selection of major connector end configurations, wire types & gauges in stock!
- Multi-pin connectors provide quick installation of wire harness, valve bank actuation and joystick control.
- Value Added Distributors can build a harness assembly from a sample harness or a drawing.

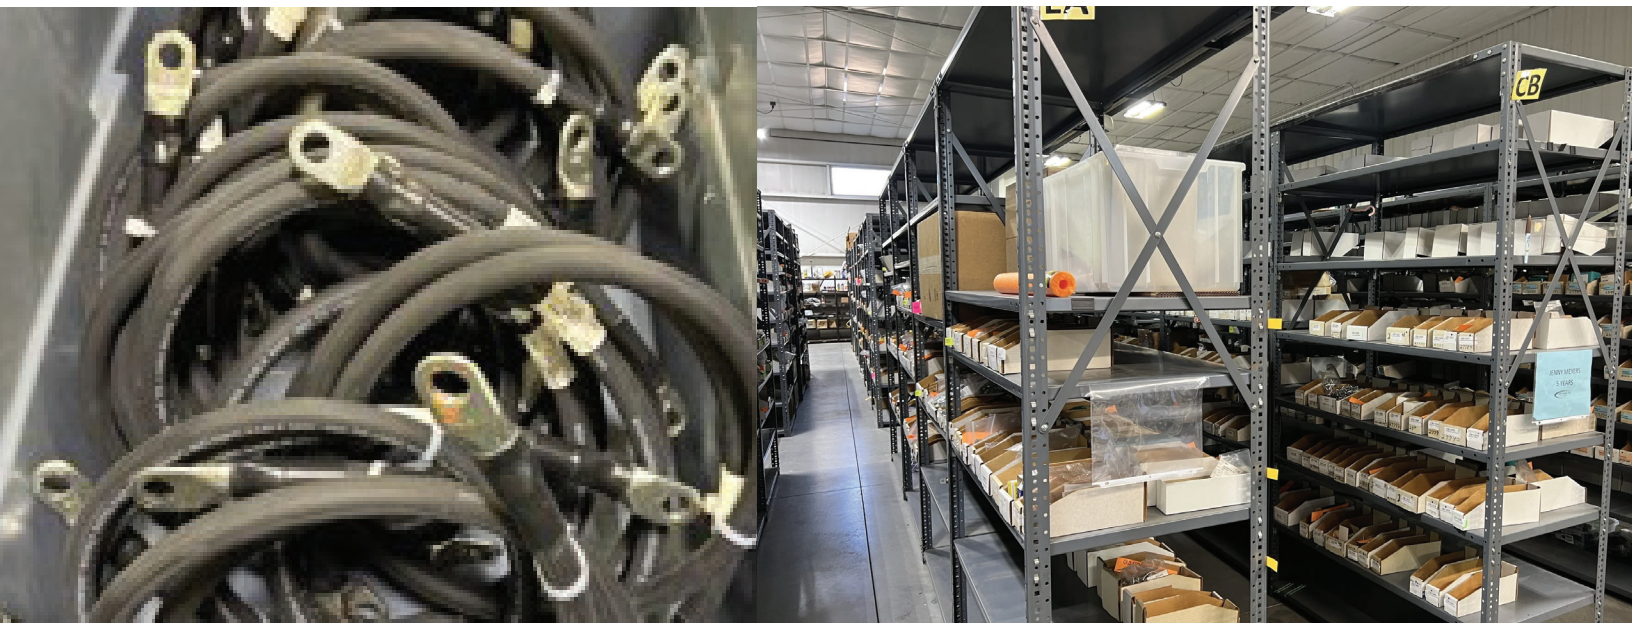

Battery Cable Assemblies

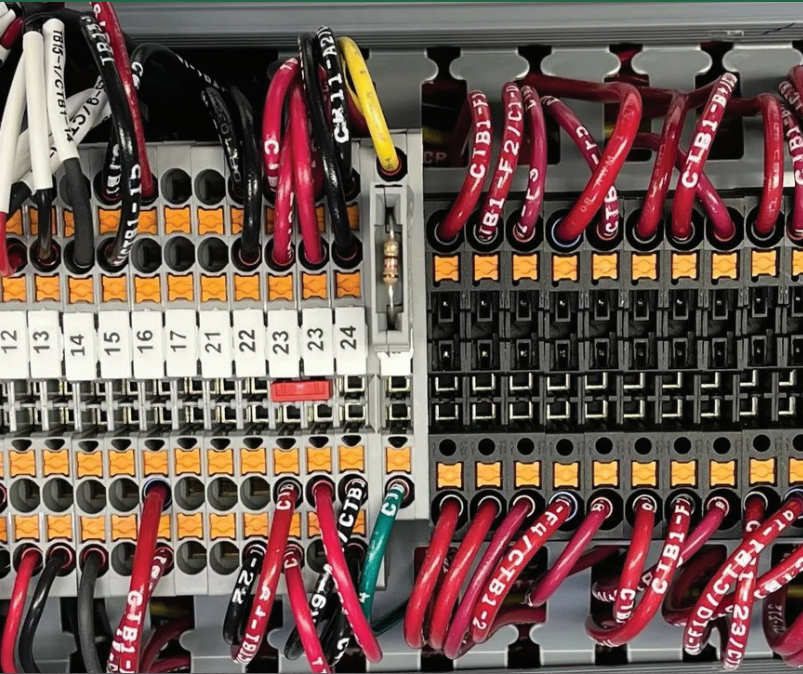

Battery Cable Assemblies are the key component in connecting an equipment battery to an electrical system. Value Added Distributors manufactures a wide variety of options to fit your application.

- Available in ranges from 2ga. to 4/0ga.
- Assemblies are sealed using dual wall shrink tubing and crimped using a 300 psi press.
- Base materials include welding cable, heater hose, clamps, lugs and PVC jacketed battery cable.
- Cables can also be assembled using welding cable. Welding cable is more flexible and has a greater amperage carrying capacity.

Main Electrical Centers & Control Panels

Value Added Distributors is your source for the highest quality control panels & Main Electric Centers in the industry! We supply engineered electrical solutions designed for reliable performance and easy installation.

Control panels provide starting power to generators. Gauges keep the operator informed of the engine oil pressure, voltage output, and temperature. A wire harness can be integrated into the control panel giving OEM's a complete installation package.

Main Electrical Centers are used to distribute power to machinery through fuses, relays, and diodes. Multi-pin connectors provide quick installation of wire harnesses for cab lighting, valve bank actuation, joystick controls, and engine and computer functions.

We're Here to Assist with Your Application!

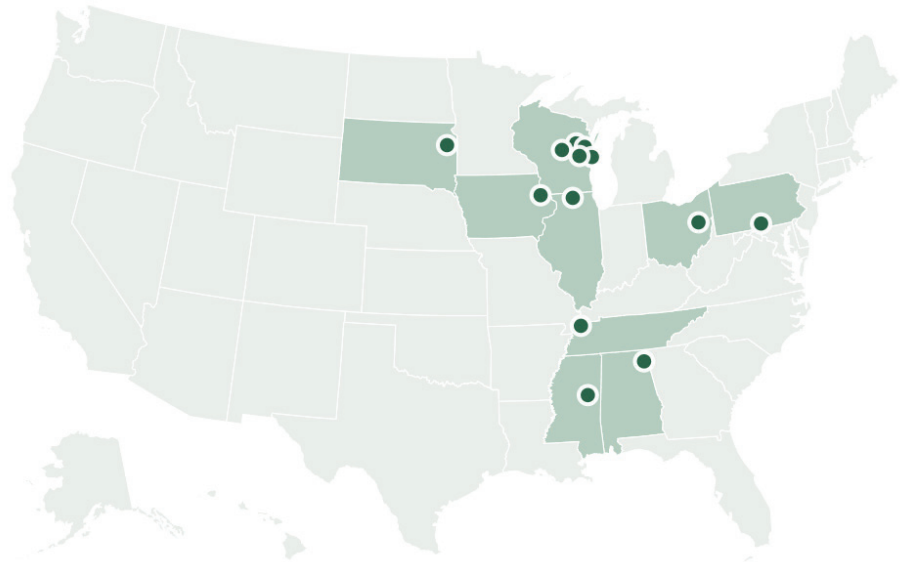

Count on Value Added Distributors for knowledgeable support, quick communication & rapid response times.
